

PROJECT 10073 RECORD

1. DATE - TIME GROUP 21 April 66 22/0030Z	2. LOCATION St James, New York, New York (1 Witness)
3. SOURCE Civilian	10. CONCLUSION Astro (METEOR) ✓ <i>znd</i>
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 3 - 5 Seconds	11. BRIEF SUMMARY AND ANALYSIS Observers saw a green-white object. One reported no tail. The other reported an exhaust that looked like a comet. Object was traveling at a tremendous speed.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE W to E	
8. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
9. PHYSICAL EVIDENCE <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Dear Sirs:

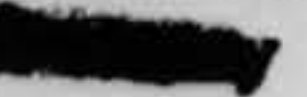

In light of the discussion concerning UFO's, and with a certain amount of diffidence, I feel I should make this report. I certainly do not have an explanation.

On Friday, April 22, 1966, I was driving north on Route 22 N.Y. heading for Bennett College to visit my wife's sister. At about 7:15 P.M., I was around Wingdale and throughout this period, I was probably driving about 35 or 40 m.p.h. It was dusk and although a crescent moon could be seen then or shortly after, the sky was still quite light. There is a hill to the east and woods to the west of the road.

I saw a blue-green ball of light moving fairly rapidly, low, horizontally in the sky from east to north or east to west. I couldn't tell distance and at first thought it was a ball like those that are shot from Roman candles. I looked for another fire work display but there was none and the ball didn't fade out but continued to move. I then noticed a triangle of white light like an exhaust east of the ball and thought I must be seeing some sort of comet with a trail. It was either quite close or moving very rapidly now above the road ahead of me. Then it seemed that the white light trail became suddenly brighter and disappeared. At that point the green light started to come down in the angle of a plane on its final descent. I saw another light of the same color seem to move slightly ahead of the other and then it was behind the trees as though it had landed. I never saw any flying object — only these lights. As I drove on, I realized that I didn't know what it was. I suppose this took only a few seconds.

I couldn't find a nearby landing field on the charts I looked at over the weekend and also realized that had it been a plane, the light on that wing would have been red.

Very truly yours,

John D.
